SAW BLADES TRADE SERIES

Norske's line of entry level saw blades feature an Ultra-Thin Kerf design requiring less horsepower and reduced stock loss. These fast and durable light duty blades are perfect for general purpose framing and fine finish woodworking.

THIN KERF | FRAMING & FINISHING

- Optimized for cordless cutting and maximum battery efficiency:
MORE CUTS PER CHARGE
- Features an ULTRA-THIN KERF design requiring less horsepower and reduced stock loss
- Designed for fast and clean cuts on dimensional lumber and plywoods
- C3 Micro-Grain carbide keeps the cutting-edge sharper for longer periods of time
- Laser-cut body, anti-vibration and expansion slots
- Anti-Kickback blade design for increased safety
- Hardened tool steel alloy body to ensure straight, accurate cuts
- ATB & ATFF tooth geometry with 10 – 20 degree hook angle

NEW AND IMPROVED!

SAW BLADES PROFESSIONAL

Norske's line of professional full kerf saw blades are designed to meet the rigorous needs of professional users. Available for a variety of cutting applications, Norske™ professional blades feature high-grade carbide tips and premium hardened steel plates guaranteed to deliver superior results.

MITER WOOD

- Fine wood finishing blades designed for all miter, sliding compound miter and radial arm saws
- Thick C4 micro-grain carbide tips precision sharpened on all sides
- Laser-cut body, anti-vibration and expansion slots
- Special ATAF (Alternating Tooth / Alternating Face) tooth grind
- Provides ultra-smooth cutting
- For professional cabinet makers and trim carpenters

MITER ALUMINUM

- For use on all miter, sliding compound miter and radial arm saws
- Designed to cut non-ferrous metals such as aluminum, brass, copper as well as plastics
- Triple chip grind with 0° hook angle eliminates blowout and kickback
- C6 micro-grain carbide tips precision sharpened on all sides
- Laser-cut body, anti-vibration and expansion slots reduce noise and vibration during operation
- Thin plate / thin kerf design

G1 **IMPACT TORSION BITS** INDUSTRIAL

BULK

NORSKE™ IMPACT TORSION driver bits are engineered to meet the rigorous demands of professional and industrial users. The optimized **FLEX TECH TORSION ZONE** flexes under load to take pressure off of the bit tip and reduce bit fracture resulting in less breakage. Our Proprietary tool steel and heat treatment process provides maximum strength and durability to handle a new generation of higher torque impact.

- Innovatively designed **FLEX TECH TORSION ZONE** absorbs high torque stress and reduces bit fracture
- Proprietary tool steel and heat treat process for maximum strength and durability
- Hardened S2 Modified Impact Resistant Steel for extended bit life
- CNC milled magnetic tips for supreme grip
- **IMPACT RATED** for **HEAVY DUTY USE**
